

SOFY MAJOR | MEMBRANE

split record (fall 2011)

OCIN014 | IMP041 | BIGOÛT0046 | APES032 | PROTO024

And here comes the long-awaited split, the artistic collaboration transposing the obvious affiliation between those two bands, but above all, the friendship developed on the road around a sixpack. SOFY MAJOR vs MEMBRANE ? Let's say SOFY MAJOR + MEMBRANE. No need to choose sides, or to talk about a confrontation considering the sound impact. Two different AND complementary universes, the same roots but

a different approach ; MEMBRANE are the french noise-hardcore veterans. Normal to find a kind of heritage in SOFY MAJOR when they manage to break free to explore other paths, following a daring mix of genres and always effective in the logic of their last album "Permission to Engage".

In four titles, the trio from Clermont-Ferrand shows once again that the field is wide, mostly destroyed, the power remains the watchword. As a result, without respite, the old school of Vesoul sounds a second charge, in three attacks, with this unstoppable formula where to hit hard and get it right, honesty is the best weapon.

SOFY MAJOR vs MEMBRANE ? If somebody got to be KO, that's the listener at the end.
